I want that rose the wind took yesterday
I want it more than this:
It had no thorn—it was the best that grow.
I want my last night's kiss.

1 want that butterfly with spotted wings That brushed across my hand Last night between the sunset and the dew— It came from fairy-land. It would have stayed, I guess, it wavered so, "Where all those panales bloom:

Where all those pansies bloom: They gave it wings to get away from me, I lost it in the gloom.

And yesterday the bees on all the heads Of clover swung so slow, I saw them take their honey; but to-day They only sting and go.

That star, that always came before the moor Dropped out of heaven has night; I hunted where I saw it fall—and found A worm with yellow light.

I want the sun to go and let the dark Hide everything away. That was the sweetest rose in all the world The wind took yesterday.

Jules C. Marsh, in Wide Awake.

MISSION OR NO MISSION?

What is the use of such ugly things, do you think, Ben?" And Fanny Brown's face was pale with fright as she drew her dainty little foot away from a large spotted toad she had nearly stepped

"Why, no use, of course," said Ben, "only to scare silly girls; and they are needed for that, because girls will screech and squall enough to startle the man in the moon, if they only see their own shadow; so they are of no use for anything.

'Yes; but, Ben, mother says everything, so it must have one."

"O, bah! Mother is a mighty smart and good woman, but she says herself she doesn't know everything; and it's my opinion that on 'this particular point,' as 'Squire James would say, she mistaken. She is crazy on the subject of missions. But this toad hasn't any, I know. And I believe a good many people are just like it-of no use

under the sun; don't you, Fan?"
"I do, if Fan doesn't. And I am one of them; a great, awkward creature that has never accomplished anything but to fill up and mar a space that some one else would have adorned. I guess Ben is right, and I belong to the class of people like the tond—of no use under the sun." And a bitter expression, sad to see on so young a face, settled in the dark eyes and around the thin lips of listening to the children's prattle.

and rather melancholy disposition, she

had, unfortunately, in her early girlhood heard a thoughtless visitor remark that in a large family of children of remarkable beauty, she was the only ugly one. the statement; for the great black eyes, straight, raven-black hair, dark complexion and thin lips, were a striking contrast to the other fair faces, with their light, waving hair, that daily surrounded the family table of the Brown's. Her disposition, too, was unique, and unlike all by whom she was surrounded. She had lived an almost isolated life, though in a large family of brothers and sisters. The brother next in age to herself had died in infancy, and the twins, Nellie and Dellie, four years youngertwo gay, bright creatures, as much alike in nature as in names and age-had no need of any company or sharer in their mutual objects of interest, while Fanny and Ben were as inseparable as subthe grove in search of nuts or berries, pouring over the same lesson or storybooks; telling to each other all their hopes and plans, or forming themselves into a self-appointed committee for the purpose, they criticised and discussed the merits and demerits of the Brown books, whose dear old authors never alluded to or reminded her of her "unfortunate ugliness," as she termed it. And drawn back any way to keep it out of her eyes, was reveling in the scenes of an-cient history; roaming with "Agnes of Sorrento" through orange groves; fol-lowing "David Copperfield" through his weary childhood, or wandering with "Evangeline" in her hopeless search for the loved and lost. But to-day a strange feeling of unrest had taken possession of her-a nervous dissatisfaction with herself and all by which she was surround-

"Lives of great men all remind us We can make our lives with We can make our lives sublime, And, departing, leave behind us Footprints on the sands of time."

"I don't believe it! There is no subnever make any 'footprints on the sands his qualities of temperance and sobriety.

of time' that any one 'seeing, may take heart again,' 'And, with a rudeness that ramains many many mind heart again,'" And, with a rudeness that remains unexplored. His loves, and snap which might have startled its his hopes, his ambitions, his wife's author from a quiet nap in his chestnut housekeeping, his daughter's vanity, the chair, she thrust the volume in the bookcase and sauntered down stairs, where bare to the careless gaze she arrived just in time to see Nelly and observer. London World. Dellie, radiant in fresh muslin, with ribbons to match, embarking for a pienic, of which she had not even heard. father and mother gone to the city on business, taking the two little ones with business, taking the two little ones with them, and she had the great, quiet house admirably adapted to the conditions of fertilizers is confined to the practice of to herself.

twins tripping gaily down the walk, and On the isolated farm houses straw thatch caught the merry ripple of their laughter is used more extensively. The roof is as they disappeared from sight. "Well, may be 'tis better to be a butterfly out in which have their foundations on the the sunlight than a dreary black cricket up in the attic," and she seated herself at the window just in time to hear Fan vided into rooms by paper partitions, and Ben's conversation. Though she had herself answered Ben's question, she leaned forward to hear Fanny's retirely removed, leaving, if necessary, joinder, which came clear and quick; the entire area in one room. The sides "No, mother is right. Everybody has of the building, or at least one or more,

was altogether unprepared, "there is father and mother—but, Ben, what does mortgage mean? I heard father tell mother this morning that he would have to mortgage the place to raise money to small quantity of arsenic, and a good pay off some debt, and they seemed in so much trouble about it; and mother said she couldn't help wishing the older children were boys, so they could help make a living; and there seemed to be nothing for girls to do. I'll tell you what it is, Ben, if I were as old and as smart as Sue, I'd teach school, or some-

"I think if you did you would have to slick up a little more than she does, and comb your hair and put on a clean collar once a week any way, or I wouldn't and oxalic acid, when a violent dis

has more sense than all the rest of us put together. And I helieve he thinks she is the prettiest child he has, too, for he often says she looks just like his mother, and you know everybody's grow twelve to lifteen inches annually,

I like to see girls like Nell and Dellsort of fancy, you know-girls who is needed to stimulate the growth and know how to comb their hair and fix increase the vigor of the tree.—N. F.

"But father says Sue is filling her

Strange revelations, all these, to the silent girl at the window. The parents' trouble to provide a living; the probable mortgage of the dear old home; her father's appreciation of herself; the morbid sellishness with which she had shut —A pretty way to cover a hair cushion herself away from the family love and sympathy, and the fact that she had never made an effort to win the love, and, with it, an influence over her gay young brother-all came over her with a rush, that, had he known it, it would have made Ben acknowledge that even that thing has a mission; and this toad is a toad had a mission, since it occasioned the conversation that caused the tumust in her thoughts.

Two hours later, as the children stood at the gate waiting for the family wagon, they were joined by a tall girl, whose long, black hair was arranged in glossy, becoming braids, decorated with two bright pink rosebuds, with another at her throat, where a snowy white collar was fastened, while her great, dark eyes were gleaming with the light of a ew inspiration.
"Why, Sue!" exclaimed the impulsive

Ben, "you look just like Mrs. Anson this evening?" And the light in the dark eyes grew brighter, for wasn't Mrs.
Anson, the minister's young wife,
known to be Ben's ideal of a queenlylooking woman?

And two weeks later Mr. Brown lisdark eyes and around the thin lips of their eldest sister. Sue, as, sitting by a window, hidden by the dark green leaves of a large lilac bush, she had been the term would begin the following Poor Sue! Of a naturally sensitive Monday.

"What does it all mean?" he inquired, turning to Sue, who had quietly entered the room. "It is the result of a short sermon

able beauty, she was the only ugly one. And her mirror seemed to her to verify the statement; for the great black eyes, of listening to."—N. Y. Observer.

Letting One's House.

To a refined mind the notion of letting one's house, one's home-the sacred center whence spring all the tendrils of the heart, the neuclus of a life's joys, hopes and suffering—must be inexpressibly repugnant. A stranger sleeps in your bed, fingers your favorite books. sneers at your pet arrangements, dines at your hospitable board, and ferrets out all your particular contrivances. Nothing is sacred, nothing is hidden from him; he cuts and mangles your precious flowers, wipes his feet on your carefully andering through preserved carpet, lolls about and tears the chintz off your peculiar armchair, breaks the old familiar crockery and upsets the ink over a long-respected table cover. The very walls seem to tell him your secrets and to unveil the thoughts of your pfind: for the atmosphere of house is, so to speak, redolent of the family as freely as if they themselves person himself; whether he be a smoker, family as freely as if they themselves had no part nor lot in it. So, left to herself, she had found companionship in self, she had found companionship in dilettante dabbling in oil-paints, an results of the self she had found companionship in dilettante dabbling in oil-paints, an results of the self she had found companionship in dilettante dabbling in oil-paints, an results of the self she had found companionship in dilettante dabbling in oil-paints, an results of the self she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints, and she had found companionship in dilettante dabbling in oil-paints and dabbling in oil-paints and dilettante dabbling in oil-paints and dabbling in oil-paints a thetic redolent of incense and faint lilies, a house-mother fond of home-made lav-ender and pot-pourri, an invalid given while Nelly and Dellie were crimping and frizzing their hair and arranging their flounces and ruffles for party or their flounces and ruffles for party of their flounces and ruffles for party of the fumes of eau-de-cologne and ether, a fine lady saturated with poudre their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and their flounces and ruffles for party of the fumes of eau-de-cologne and the fumes of eau-de-cologn peau d'Espagne-whoever and whatever he may be, the house tells his history, in its faint odors, in the perfume of forgotten drawers, in the reek of a study-curtain, in the intangible quality of the air. The arrangement of the furniture be-trays the tone of a man's mind, whether he be precise, orderly or luxurious; the combination and harmony of colors reveals his taste, the quality of stuffs decides whether he be penurious, generous or lavish. The number of dining-room ed. skin of a sweet potato, after due remonstrance, try to make it as nearly eatable as possible. To do this the potatoes should be baked in a dripping-pan; the skin will then be baked uniformly, and skin will then be baked uniformly, and there is almost no danger of its burning on one side. If you have enough left

> -A pretty way to cover a hair cushion is to knit stripes of zephyr worsted or of yarn in different colors. Suppose you have three stripes, one of red, one of blue, and the third of black, knit them together, put them over the cushion, and at each corner fasten a scarlet bow, or, instead of bows at the four corners, a cord and balls made of worsted look very pretty at the two front corners. This cushion has a soft, warm look which is appreciated in winter .- N. Y. Post.

-Preserved Quinces: Quinces get black if allowed to stand; pare them and quarter them quickly; I remove the seeds, as it makes the sirup in boiling pasty; I use hot water to put them in when they are to be boiled; when they are boiled tender, take them out and drain them; make a sirup with three pounds of sugar to a pint of water; re-place the pieces of quince into the sirup and cook very carefully; take out the pieces and put in jars, and then add sirup. - St. Louis Globe.

-Most persons, no doubt, have seen hogs eating hay during the winter months, in but small quantities, it is true, but still eating it. If clover is cut when in fullest bloom, well cured and stored away, the hay becomes a valuable food for hogs, especially when fed but little else than corn. To utilize it, cut it in a cutting box, a half to three-fourths of an inch long, mixed with bran, shorts or cornmeal, and moisten it with swill, or even water; if made scalding hot the better. Then let it stand for a few hours before feeding it out. Any of the grasses, if cut in bloom and made into hay, will answer a good purpose, but clover is preferable. Besides being valuable as food, hay thus fed is a preventive of disease in hogs full fed on corn. - Chicago Journal.

Sowing Wheat.

A perfect wheat soil, as has been repeatedly stated on this page, must contain lime, potash, phosphate and nitrogen in their various combinations with other mineral elements, and in due proportions, and at the same time be sufficiently porous to permit water to pass down readily and leave the surface dry and firm. Lime soils are especially soils by liberal manuring can be made productive, and no means perhaps are more effective than clover and plaster or

Soils that yield good clover crops will yield good wheat crops, and a clover sod is one of the best natural preparations for wheat. Not a few cultivators seed corn ground to wheat. Some sow wheat among the standing corn, but this is not largely practised, as it leaves the surface of the land in bad order. Others cut up the corn and plow and sow wheat. The lateness of this operation is an objection in many sections. Other cultivators select an eat field or fallow land. There is a great diversity of opinion in regard to sowing wheat after barley or oats. Many successful farmers do it; while, on the other hand, many consider the practice a careless one and unworthy of good husbandry.

The relative merits of drill and broad-cast sowing of wheat are discussed every season. The area seeded with the drill, according to recent reports, amounts to fifty-seven per cent. in the wheat-grow ing States. Where the soil is in good condition and free from obstructions in the way of rocks and stumps, the preference is almost invariably for drilling Among the advantages claimed for drill ing are saving of seed and placing the fertilizer in closer proximity to the seed. A great argument in favor of drilling is that it must be preceded by thorough culture. Many farmers roll their land just before the drill to solidify the surface, while the soil is left loose underneath.

Clover and field-peas are accepted as among the cheapest and best renovators of the soil and produce excellent results, especially in thin soils. The application of lime increases the yield of any of the grain crops and is beyond question bene-licial to wheat, but will exhaust the land if persevered in without rotation. After wheat is sown lime is often advantageously used as a top dressing when mixed with ashes, muck, etc. Where the use of spreading them over the ground and plowing in, or scattering over the surface and harrowing in previous to sowing the seed, the operation of fertilizing is confined to stated periods of the year. But where the practice is adopted of surface manuring after germination and growth has been made, the work of man-uring may go on from fall until spring, and in that way the winter accumulation of manure be used. In no case is it well to spread manure heavily enough to induce rank growth and thus endanger the crop by lodging or rust. In applying ground bone and the superphosphites on wheat it is generally sown broadcast. Better drainage and better tillage are each year being given by professional wheat cultivators, who have also discovered that these interests and better tillage are

Does Your Head Ache?

dees this c n be learned from the following:

Kansas Citt, Mo., June 26, 1882.—Moving from the State of New York to the Western country, I was stacked with malaria and general debility. I had lost all appetite and was hardly able to move about. I had tried a great many remedies, but nothing bettered my condition until I began using Warner's Safe Kidney and Liver Cure, which seemed to help me right away, and I feeles well as I ever have in my life. It is a blessing to people in help me right away, and I feeles well as I ever have in my life. It is a blessing to people in this malarious country. C. F. Whiliam, 1412 Grand Aye., of William & Co., Hardware. This great remedy has proven its power in innumerable cases, and is to-day more exten-sively used in malarial districts, whether in cities or in the country, than any or all othe remedies for the cure of the same class of dis ease. No one can afford to trifle with the first symptoms of malaria, but instant care should be taken to check it on the start before its evil influences overshadow the life.

"Are you not alarmed at your children "ARE you not alarmed at your children playing on that cistern with the trap door open? Are you not afraid they will drop in some day and get drowned when you are not looking on," said one Austin lady to another whom she was visiting. "No," was the complacent reply; "we get our drinking water from another cistern that the children can't tumble into."—Texas Sillings.

FEVER and AGUE

Or CHILLS and FEVER.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a sure, and whole families have been cured by a single bottle, with a per-fect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS

will be sufficient.
The genuine SMITH'S TONIC SYRUP must have DR. JOHN BULL'S private stamp on each bottle. DR. JOHN BULL only has the right to manufacture and sell the original JOHN J. SMITH'S TONIC SYRUP, of Louisville, Ky. Examine well the label on each bottle. If my private stamp is not on each bottle do not purchase, or you will be deceived.
